The following changes are done in Round 2 SpoC submission.

1. **In Table 3.1:** Removed the “Advantage” column to make it clear that we do not claim any security if the prescribed data or time limit is breached. Consequently, some relevant text in Section 4.1.4 has also been modified. *We note that this does not require any changes in design.*
2. **In Table 6.3:** We have updated the table with the actual implementation results of SpoC-128.
3. Added comments in the reference implementation code to make it more comprehensible.
4. Fixed some minor typos.
5. Updated the website link in coversheet to the SpoC website and current affiliation of Riham AlTawy.
